

CLAIMS

1. A modular plant support system for plants comprising :

a tip, a stake and a connector section and holes;

5 said connector section being generally but not necessarily fixedly attached to said stake;

said connector section being hollow and having holes to allow a stake to be inserted into the top of said connector and through said holes in order to construct a structure.

10 2. A modular plant support system for plants as in claim 1 comprising :

a separate tip which is releasably connected to said stake by a releasably connecting means.

3. A modular plant support system for plants as in claim 1 whereas :

15 said holes are being paired.

4. A modular plant support system for plants as in claim 2 comprising :

a tip releasable means consisting of two generally arrow shaped clips which engage suitably configured and sized notches hollowed out into said stake.

20

5. A modular plant support system for plants as in claim 1 comprising :

stakes having different lengths.

6. A modular plant support system for plants having the following method of

25

assembly :

said stakes inserted through said top and said holes of said connector section in order to build a structure.

5 7. A modular plant support system for plants as in claim 1 comprising :
stakes and connectors that are round in shape.

8. A modular plant support system for plants as in claim 1 comprising :
stakes and connectors that are square in shape.
